

**MIC Business Solutions, Inc. launched ERP system
“Microsoft Dynamics GP” for Takara Sake USA Inc.**

NEW YORK, June. 3, 2011 - MIC Business Solutions, Inc. launched ERP system “Microsoft Dynamics GP” on Jan 1, 2011 for Takara Sake USA Inc. based on Berkeley in California is a subsidiary of Takara Shuzo Co., Ltd. (Headquarter: Kyoto, Japan) which is a leading company of alcohol-related business and biotechnology known by "Sho Chiku Bai" brand of Sake, "Takara Mirin" and "Takara Shochu".

Takara Sake USA Inc. needed to implement the new system integrated all business operations such as purchase/sales orders, production, distribution and accounting to improve their operational efficiency and to prepare for their business expansion in the future replacing former systems separated between order systems and accounting system.

Microsoft Dynamics GP is an integrated ERP package software with many functionalities. It enables easy user training and operation due to the similar user interface as Microsoft Office applications. It is also possible to retrieve and analyze data as well as create report by using Microsoft Excel. Custom report formats required for unique operations and management in liquor industries were developed by MIC Business Solutions, Inc besides standard report formats.

The new system integrated whole business operations such as purchase/sales orders, production, distribution and accounting, and realized improving operation efficiency, managing inventories, tracking production lot and sharing management reports by the new system. It also contributed to shorten time for monthly settlement by unifying the data input and management, enabled to acquire important data for business decision timely by grasping accurate company situations in real time, and enhanced the cost management by the production management system reform..

Based on experience in various business industries/operations as part of a trading company, MIC Business Solutions, Inc. provides the most suitable IT solutions for enterprises from defining requirements for accounting, sales and distribution, material management systems to building interfaces for

sub systems of EDI and WMS by experienced engineers with IT architect (TOGAF*) certified license and international project management license (PMP**).

*The Open Group Architecture Framework : A framework for enterprise architecture developed by members of The Open Group, an industry consortium to set vendor and technology neutral open standards for computing infrastructure.
